

Lube Oil System (LOS) Specification

1.0 Operating Conditions & Parameters

The lubrication system must satisfy the following criteria:

Application: Steam Turbine Lube Oil Skid

Flow Rate: 50 LPM

Oil Grade: ISO VG 46

Operating Pressure: 10 Bar (Max 16 Bar)

Operating Temperature: 45 Deg C (Max 65 Deg C)

Filtration Level: 10 Microns nominal

2.0 Construction Materials

Reservoir Material of Construction (MOC): SS304

Heat Exchanger MOC (Tubes): Copper

Control Panel Requirement: PLC Based with HMI
